Reasons for Allowance

Applicants' response to the last Office Action, filed October 4, 2004 has been entered and made of record.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 11 and 21-22 are allowable over the prior art of record.

Claims 2-10, 12-20 depend from claims 1 and 11, therefore, are allowed.

Independent claims 1, 11 and 21-22 recite the limitations of : transform the decoded visual data block to yield a transformed data block; and apply a constrained quantization and inverse quantization operation to the transformed data block, the constrained quantization operation being conditioned on a comparison of the signal received by the decoder to the transformed data block, the constrained quantization and inverse quantization operation yielding a partially decoded output signal. The combination of these features as cited in the claims in combination with the other limitations of the claims, are neither disclosed nor suggested by the prior art of record.

The closest references of US 6064324 to Shimizu et al. discloses a constrained quantization and inverse quantization for output a partial image signal. However, he does not teach the limitations of cited above.

In view of the Applicant's arguments, the rejections and objections of claims 1-22 are expressly withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
